GROUP STRUCTURE

Our
strategic
vision

Vision: Create a strong and diversified platform for sustainable growth.

Mission: Invest in companies with leadership potential, supporting innovation, efficiency and long-term results.

FOCUS

Portfolio diversification

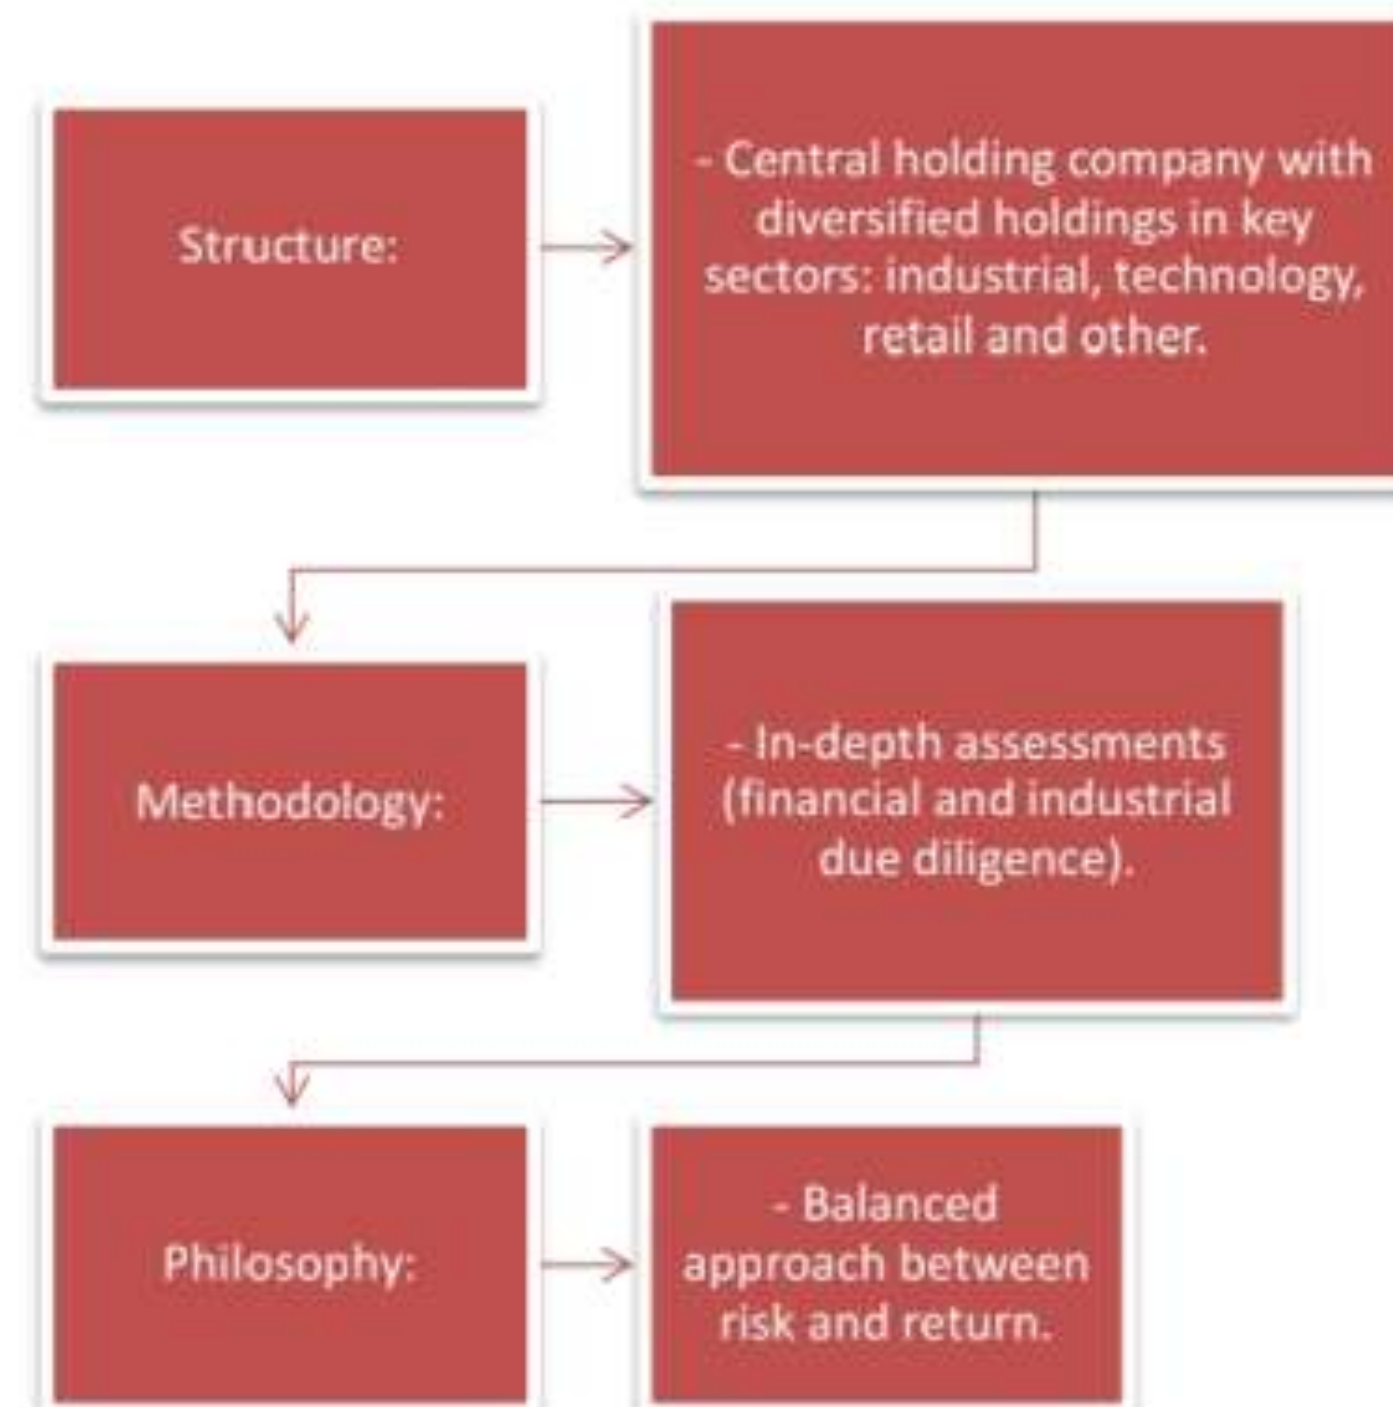

Long-term investment approach

Enhancement of corporate talent

GROUP STRUCTURE

Management model and investment criteria

GROUP STRUCTURE

Diversified portfolio and sector synergies

Objective: To build a portfolio of leading companies in the following sectors:

1. **Industrial:** Manufacturing Innovation.

2. **Technological:** Digitalization and AI.

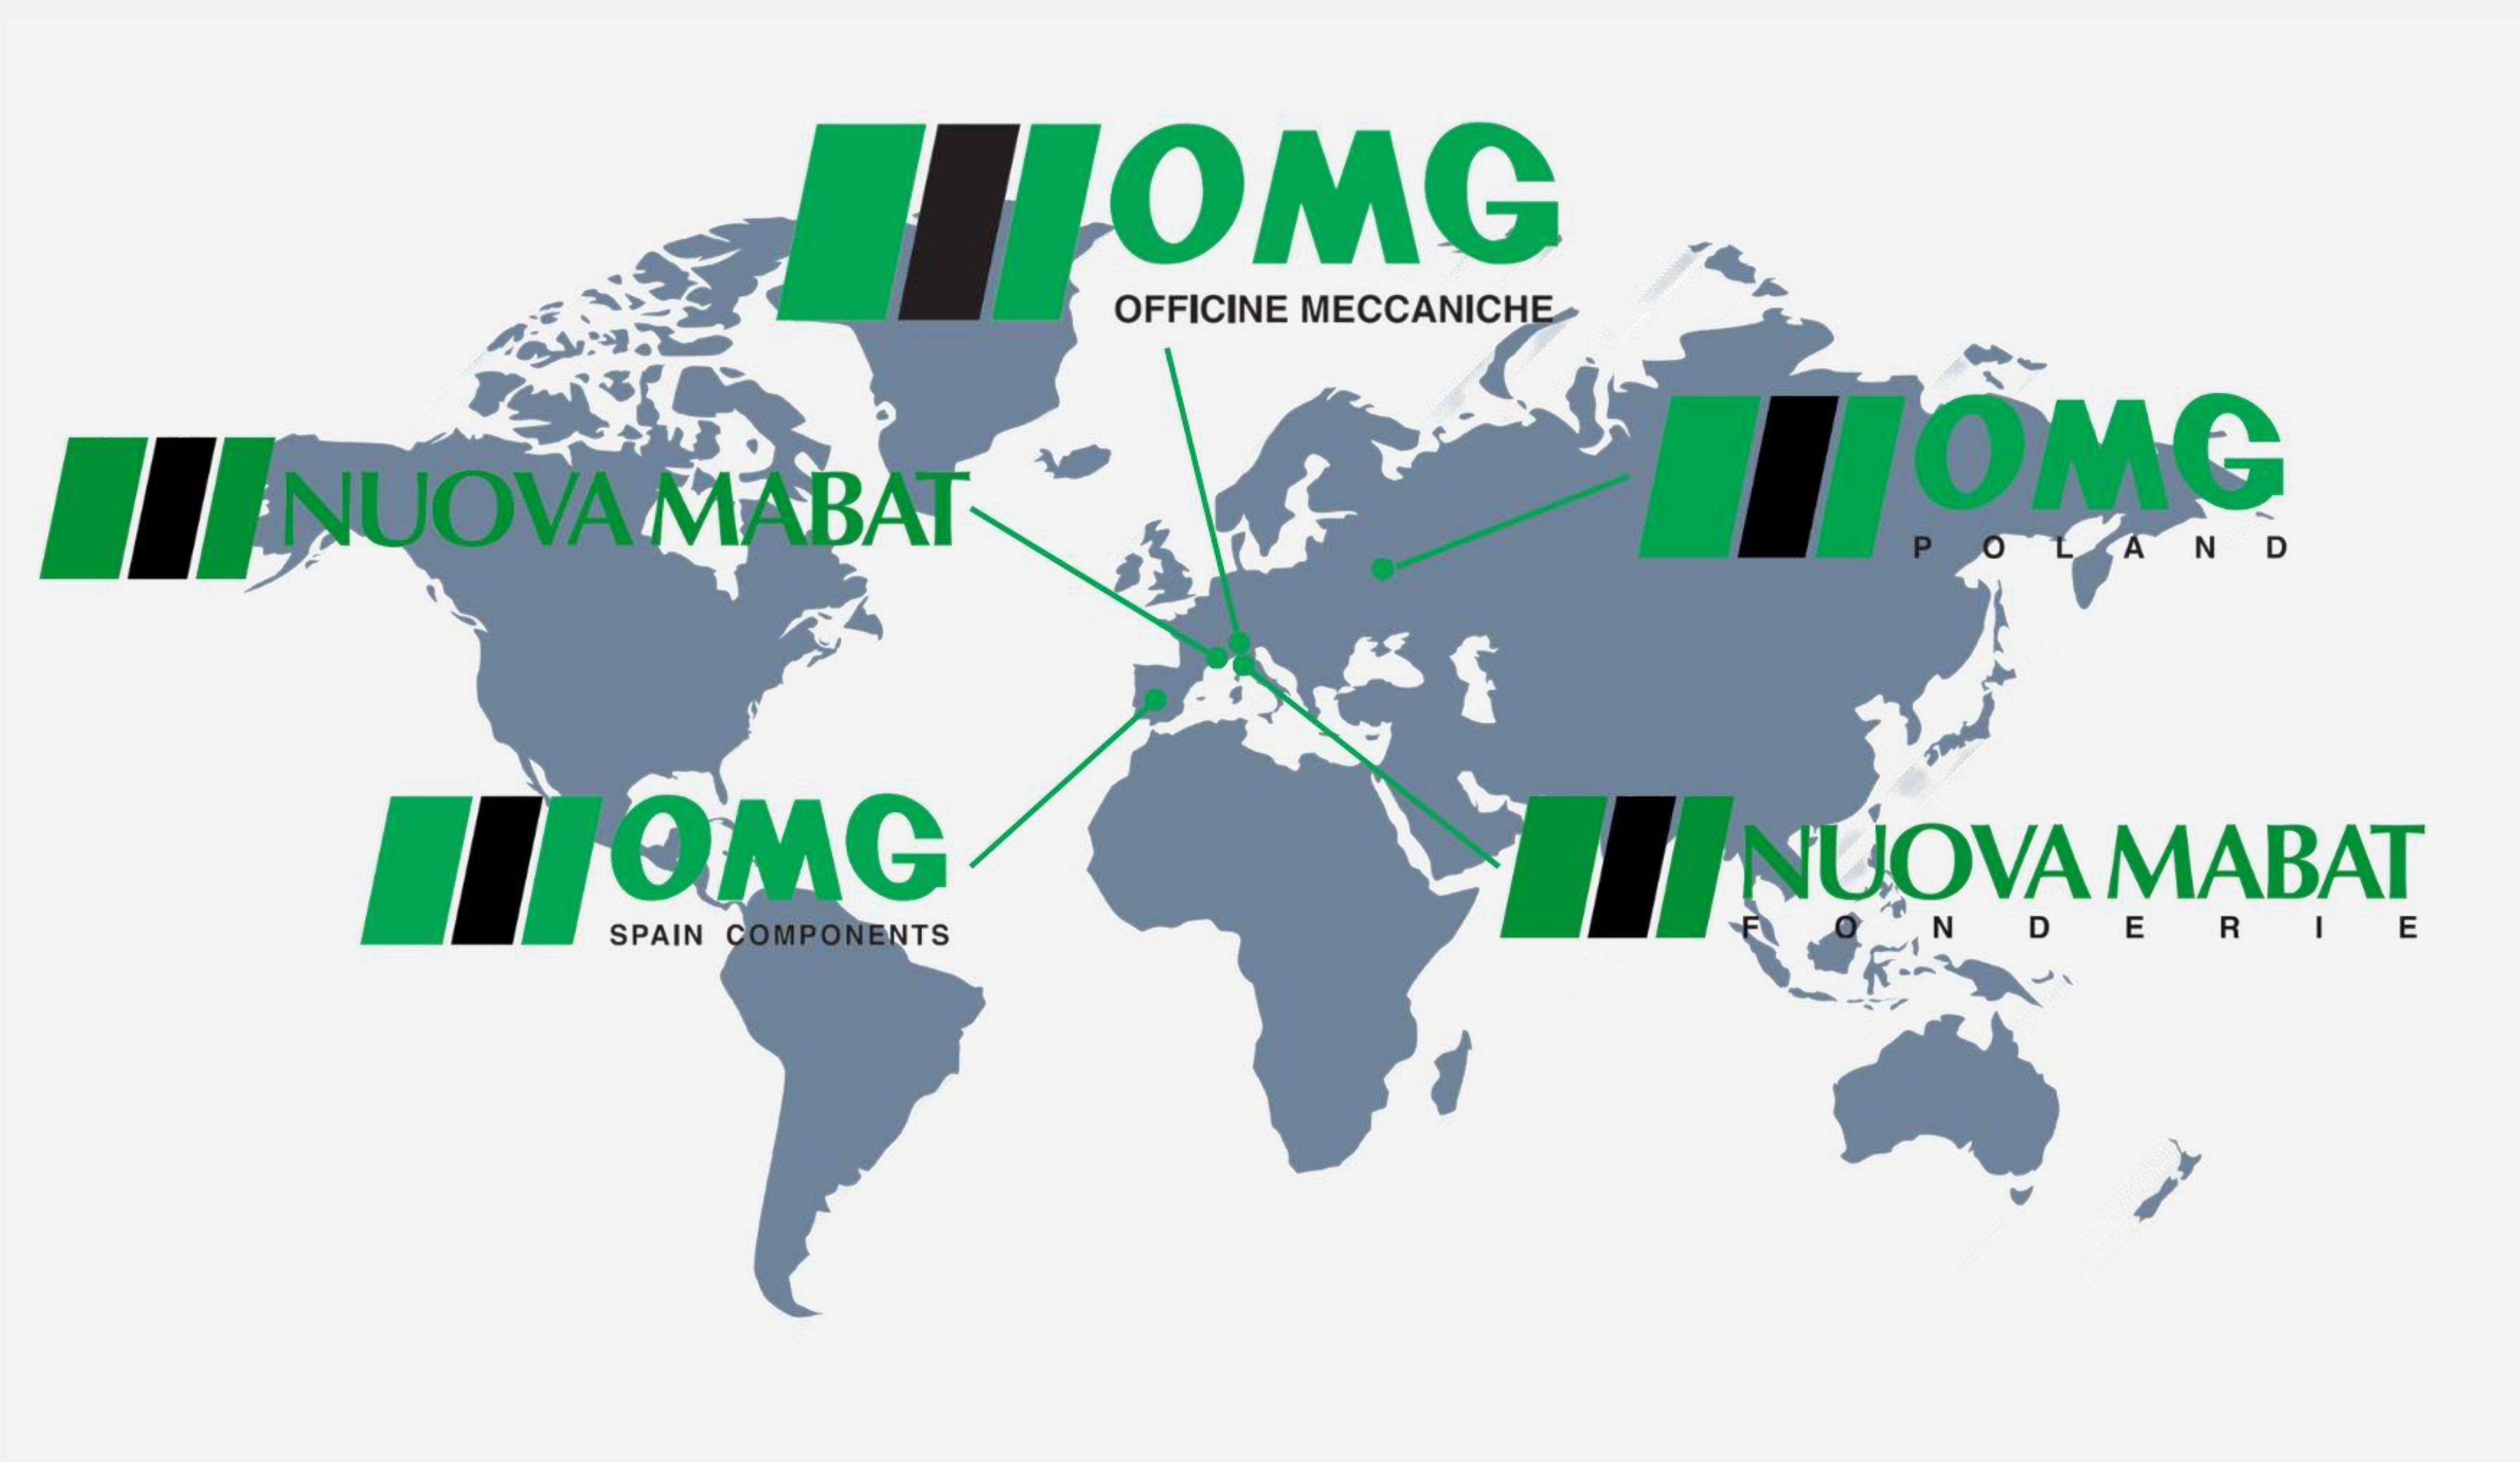

3. **Healthcare:** Innovation in healthcare.

4. **Retail:** New frontiers of commerce.

5. **Renewable energy:** Green transition.

Strategy => Create synergies between investee companies, optimizing resources and skills.

OUR VALUES

For 75 years, our work has been driven by the values we strongly believe in, values that continue to guide us, inspire innovation, and shape the way we look to the future.

“The courage to look to the future since 1949”

OUR MISSION

CONSTANT FOCUS ON
INNOVATION AND ON
DEVELOPING NEW
TECHNOLOGIES AND
PROCESSES

The high level of technology and reliability offered by **OMG Group** is the result of the integrated production process that exists *within the company*.

This includes all the phases of the manufacturing process itself, from research and development to testing, and the casting and mechanical processing stages.

MACHINING

We can cooperate in design, develop prototypes and even perform mass-production through robotized systems that integrate control stations and meet the quality and cycle time specifications that are required for an appropriate just-in-time supply.

confidential

STAMPING & WELDING

We design and develop in house the equipment and molds used in the manufacturing workshop. With our prototype machines and a modern laser-cutting machinery, we can also reproduce small series.

STAMPING & WELDING

We range from sheet metal forming, tube deformation to cold forming section stations to hydraulic and mechanical presses of different sizes, also equipped with inter-press robots; we offer you **a complete system to produce your parts.**

Mechanical and hydraulic presses up to 1,250 tons, equipped also with automatic coil welding systems can insure **greatest efficiency and accuracy** thanks to the progressive machining and robotized systems.

ROBOTIZED PRODUCTION

By being always updated on the new technologies and investing a significant part of the revenues in robotized systems and automatic machines, we are the leading partner for customers that need a continuous improvement approach that strengthens the relationship.

confidential

FOUNDRY & ALUMINIUM

The foundry acquisition is part of a medium-long term strategy that OMG group has developed to diversify the production processes and offer to the customers new technologies and experience, opening new markets and business opportunities.
